

What Training is Required?

A training course is required for each certification.

A refresher training course is required for certification renewal.

The application and renewal forms explain the training requirements.

Note: Lead Inspectors, Lead Inspector Risk Assessors, and Lead Abatement Supervisors are required to pass a third party exam in addition to the training course.

No training course is required for licenses.

Where Can I Get a List of Approved Training Courses?

A list can be found on the DPH website:

www.dph.state.ct.us/BRS/Lead/lead_program.htm

Click on "List of Approved Training Courses"

Or you can call :

860-509-7559

Or

860-509-7299

And a list can be mailed to you.

What if I am Already Licensed in Another State?

Out of state lead contractors who want to work in Connecticut must apply for a Lead Contractor's License and use Connecticut certified workers.

There is reciprocity for lead training courses but one still needs to apply for a Connecticut specific certification.

Where Can I Get a License or Certification Application?

Applications can be found on the CT-CLIC website:

www.ct-clic.com

Click on "Environmental"

Or you can call the Environmental Practitioner Licensure Unit at 860-509-7559.

Completed applications can be mailed or dropped off at:

CT Department of Public Health
410 Capitol Avenue, MS #51EPL
P.O. Box 340308
Hartford, CT 06134-0308

Lead Licensure & Certification Requirements for Lead Inspectors & Abatement Professionals Working In Child Day Care Facilities

**Connecticut Department
of Public Health**

Keeping Connecticut Healthy

Childhood Lead Poisoning Prevention Program	Lead Environmental Management Unit
860-509-7745	860-509-7299

Environmental Practitioner
Licensure Unit
860-509-7559

When is a Lead Inspection Required?

The Lead Poisoning Prevention and Control and the Child Day Care Centers and Group Day Care Homes Licensing Regulations require that a lead inspection be conducted for all newly licensed child day care centers and group day care homes or for licenses that are transferred to a new owner for an existing facility.

What is Lead Abatement?

Lead abatement is the removal, replacement, enclosure and/or encapsulation of lead paint in and around homes and day care facilities.

Note: In some cases repainting, using lead-safe work practices, may be a way to correct the hazard.

Why are Licenses and Certifications Required?

To help ensure that lead inspection and abatement work is done safely and properly. Proper abatement is important for the health of children that attend the day care facility.

What Are the Licenses?

Inspection:

Lead Consultant Contractor License

Abatement Work:

Lead Abatement Contractor License

Both Inspection & Abatement Work:

Lead Abatement Consultant Contractor License

What does a License Cost?

- ? The application fee for a lead contractor's license is \$500.00.
- ? A license will expire one year from the last day of the month that it was issued.
- ? Renewal fee is \$500.00 annually.

Who Needs to be Licensed?

Any business or person who contracts to:

- ? Abate lead in and around a home or day care facility.
- ? Inspects and/or assesses the risk from lead hazards in and around a home or day care facility.
- ? Develops plans to abate or manage lead in and around a home or day care facility.

What Does a Certification Cost?

- ? The application fee for each lead certification is \$25.00.
- ? Each certification expires on the last day of the individual's birth month.
- ? Renewal fee is \$25.00 annually.

Who Needs to be Certified?

- ? **Lead Abatement Supervisors:** oversee lead abatement projects
- ? **Lead Abatement Workers:** perform lead abatement work
- ? **Lead Inspectors:** inspect for lead
- ? **Lead Inspector Risk Assessors:** assess the risk from lead hazards
- ? **Lead Planner-Project Designers:** develop lead abatement and management plans

Licensed lead contractors must use certified personnel to perform lead abatement, inspection, risk assessment, and plan development work.
